BASIS/ BASES OF VALUE USED

This valuation report relies upon the use of fair market value as the standard of value. For the purposes of this valuation, fair market value is defined as the expected price at which the subject business would change hands between a willing buyer and a willing seller, neither being under a compulsion to conclude the transaction and both having full knowledge of all the relevant facts. This is essentially identical to the market value basis as it is defined under the International Valuation Standards. The valuation was performed under the premise of value in continued use as a going concern business enterprise. In my opinion this premise of value represents the highest and best use of the subject business assets.
